hardness for
drive thru
the hoof wall
perfectly and
clench**

HARDTOP =
hardened nail
crown for an
even wear with
the horseshoe,
so the shoe
will stay longer
firmly attached
to the hoof

Perfect for
traditional steel
horseshoes,
aluminium shoes
and aluminium
race plates

Extra sharp & extra
smooth for less
damage to the
hoof

NEW LIBERTY HYBRID SECURE HARDTOP

An all-round hoof nail with improved grip for the horse and a hard-wearing lock in the crease. The hoof nail has all the strong features of Liberty for perfect driving and locking, but has been enriched with an innovative nail head that has more and harder material in the head for improved grip and durable firmness of the shoe.

LIBERTY HYBRID SECURE HARDTOP

The new Liberty Hybrid Secure Hardtop horseshoe nail has all it takes to have a durable firm shoe. The nail design is distinguished by the reinforcement of wear sensitive parts of the hoofnail. The hoof nail has been designed with a larger nail head for an even **better lock in the crease so the horseshoe remains long term firmly attached to the hoof**. In addition, the nail crown has been hardened, which means that the nail head now wears down evenly with the horseshoe, so that the lock remains optimal for a long time.

IMPROVED GRIP AND FIRMNESS OF THE SHOEING
